<b>Detection/counting speed:</b>	> 2 notes per second (note processing time 0,3 s)
<b>Transport system:</b>	Belt type, motorized
<b>Feeder system:</b>	Manual type
<b>Power:</b>	100 - 240 V; 50/60 Hz (adapter included) Internal rechargeable battery (optional)
<b>Power consumption:</b>	Less than 10 W

The operation of Evision SD is very simple. Only one single button handles all functions. A clear, blue display shows the detection and counting result.

## Advantages

Evision SD offers reliable and efficient verification of banknotes through dedicated sensor technology.

The elegant size-optimized design requires very little desk space.

Evision SD is the easiest to operate euro detector on the market. Every function is handled through one single button, with a very logical operation.

When new banknotes are issued, the software can be updated by using a microSD memory card or the USB connection. It has never been easier.

## Warranty

12 months against all defects in material and labour.

## Benefits

Evision SD offers safety and security to shops and employees by giving a reliable, subjective decision in the verification of banknotes.

Evision SD saves time and money by requiring practically no training of the user and by the simple and fast operation. Payments are not delayed.

No need to doubt the genuineness of banknotes; Evision SD will give you the answer.

Fast, small, quiet, efficient, beautiful and simple. Evision SD is the smart solution.

## Approvements

RoHS compliant and CE marked.

Software can be updated by inserting a standard microSD memory card in the slot in the battery compartment.
